SHOWERS

90
YEARS
of Showering

Why we're still No.1 after 90 years.

Water always has been and always will be at the heart of everything we do. We've learnt from it, each and every droplet. We've learnt that by empowering it with Magni-flo™ we can make it 3x more powerful, that by amplifying it with Airboost™ we can make it go further, and by harnessing it with Flipstream™ we can literally make it dance. But most of all, it has given us the knowledge to shape our designs and continually shape the future of showering. Which means, today or tomorrow, you'll always experience the moment when the world can wait. The moment of... *Showering perfection™*

mira
SHOWERS

Choosing your shower

Step 1: What kind of water system do you have?

Low pressure gravity system

You'll know you have this system if:

There's a cold water tank in your loft and a hot water cylinder in your airing cupboard.

We recommend:

- Mixer showers (with optional pump for stronger flow)
- Digital mixer showers
- Power showers

High pressure - mains pressure combination boiler

You'll know you have this system if:

You have a boiler the size of a small kitchen cupboard somewhere in your house – you won't have hot and cold water tanks.

We recommend:

- Mixer showers
- Digital mixer showers
- Energy-saving eco showers

High pressure - mains pressure unvented

You'll know you have this system if:

You have a boiler the size of a small kitchen cupboard somewhere in your house.

We recommend:

- Mixer showers (for a powerful flow)
- Digital mixer showers (for a powerful flow)
- Energy-saving eco showers

Cold mains supply

You'll know you have this system if:

You don't have stored hot water at all or, don't want to use up all the hot water when you have a shower.

We recommend:

- Electric showers (the higher the kW rating, the stronger the flow)
- Pumped Mira Elite ST for low pressure cold water supplies*

*Must be tank fed

At a glance

Compatible with all systems.

Mains pressure combination boiler. Mains pressure unvented. Low pressure gravity with pump.

Low pressure gravity system.

Cold mains supply only.

NOTE: If in doubt, give us a call or contact a qualified plumber.

Step 2: What type of shower do you need?

If you're replacing a shower and you don't want to re-tile, it's worth checking the position of the hot and cold water pipes and the shape and size of the replacement shower. That way you'll be sure that the new shower fits over the old screw holes and onto the pipework. To make life easier, some of our mixer showers have adjustability on the inlet pipe centres.

Mixer showers

Mixer showers take water from both your hot and cold water supplies and mix it to create your ideal temperature.

- Most Mira mixers feature Magni-flo™ which provides up to 3x more flow even on low pressure
- Optional Mira twin enduro pumps for low-pressure systems
- Range of styles and sizes
- Choice of temperature control – manual, pressure balanced or thermostatic
- Most mixers work on all water systems

Power showers

Power showers take water from the stored hot and cold water supplies and mix it together to create your ideal temperature. All-in-one power showers have an in-built pump which also boosts the flow of water.

- Choose either an all-in-one or mixer shower and pump combination
- Perfect for homes with plenty of hot water
- Not suitable for high pressure systems

Digital mixer showers

Digital mixers take water from your hot and cold supplies and mix it together. The digital technology ensures you enjoy the exact temperature, every time.

- Variants available for different systems
- Stabilises temperature digitally
- Additional warm up and lock off modes
- Easy to install
- Mixer unit can be mounted away from the shower, such as in the loft
- Reduced pipework
- Remote wireless control

Electric showers*

Electric showers take water from your cold water supply and warm it by passing it safely over heating elements contained within the unit.

- Works even if your boiler fails
- Works without the need for stored hot water
- All our electric showers are approved as water efficient because they use less water
- The pumped Mira Elite ST is available for low pressure gravity systems

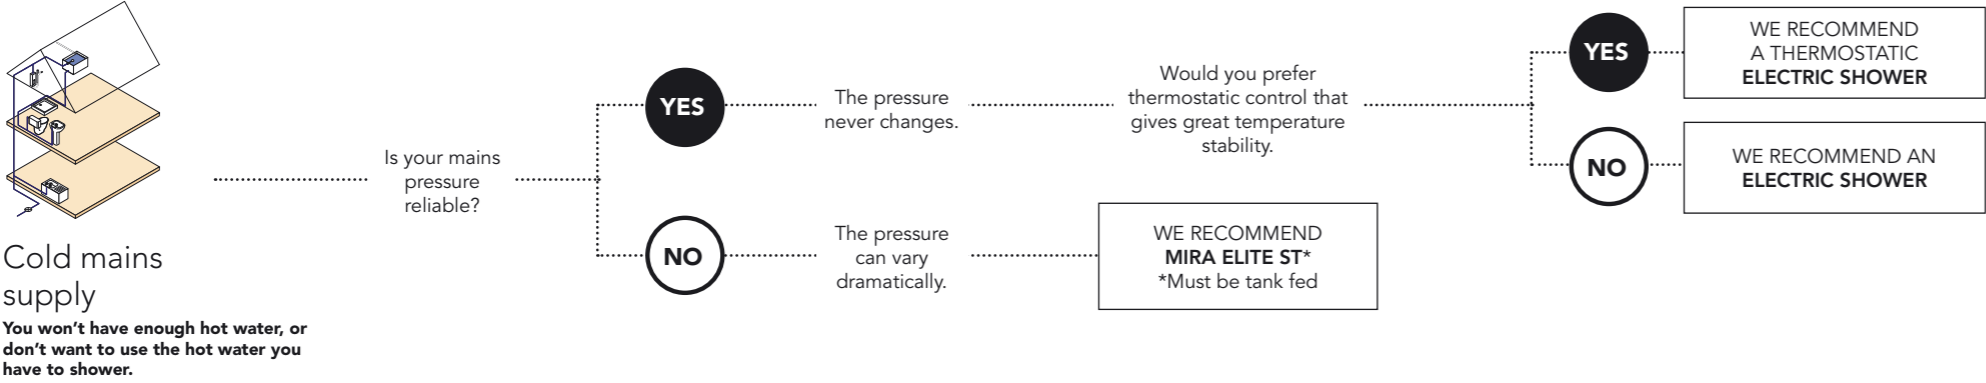

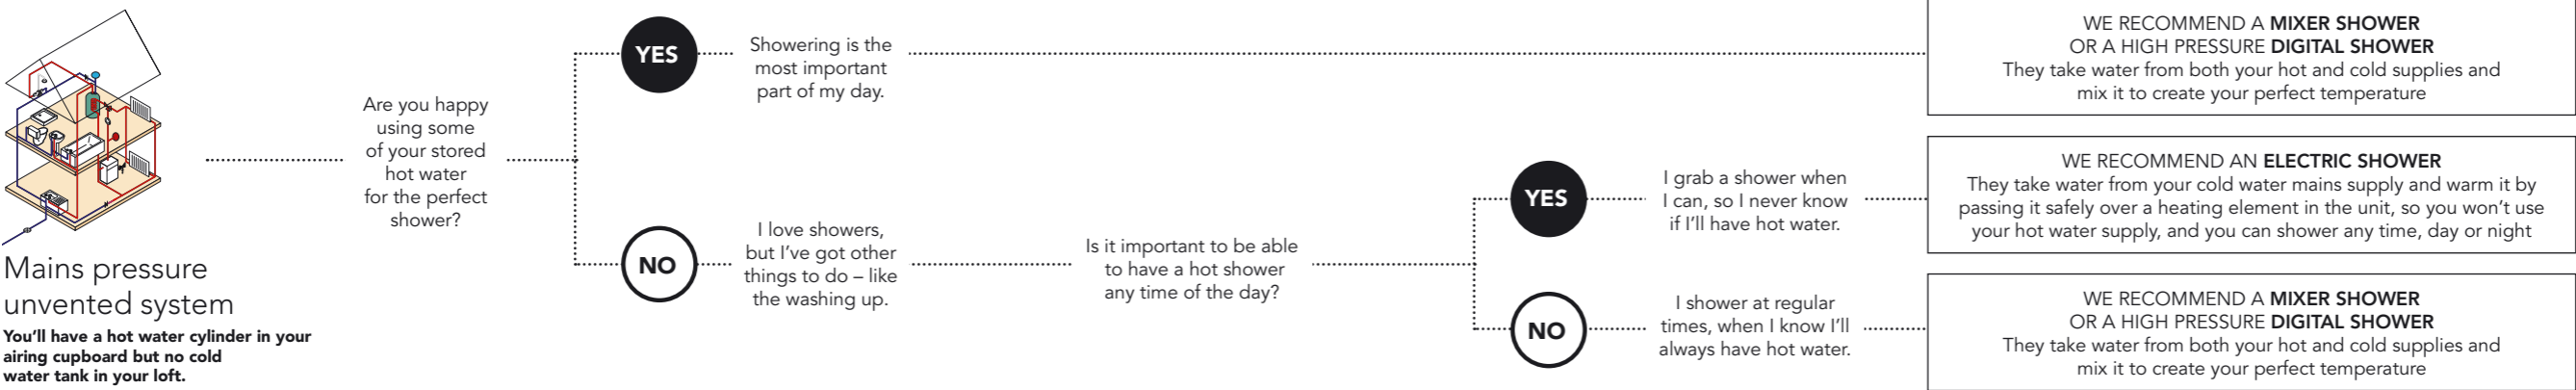

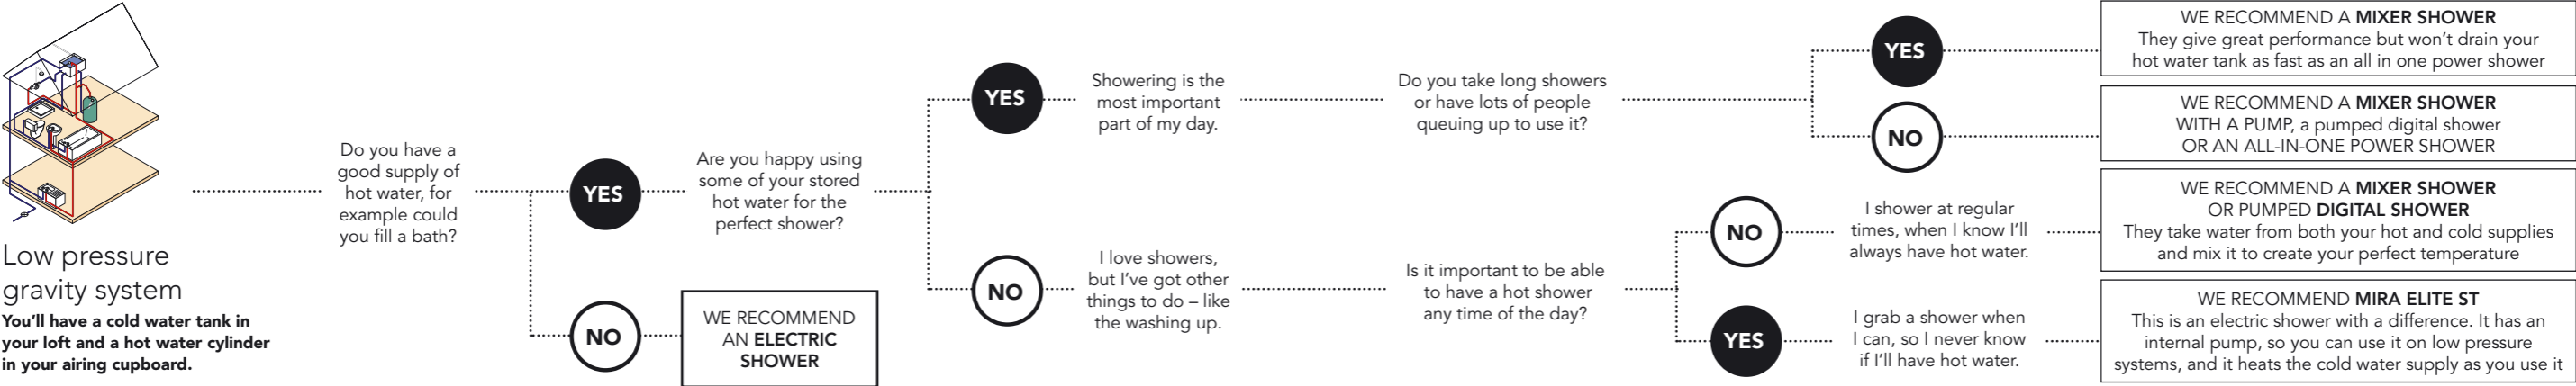

Eco showers

Our eco showers use flow regulators to limit the maximum flow of water, and our eco showerheads uses aerating technology to create the sensation of a normal, drenching flow while using a lot less water. Our eco showerheads are to be used with our mixer showers only.

*If you're replacing an existing electric shower your installer will need to ensure that the installation complies with the latest wiring regulations.

Step 3: Our shower selector makes choosing easy

Mixer showers

Mixer showers are ideal if you have lots of stored hot water, and if you have a high pressure system, a mixer shower should give you a more powerful flow than an electric one.

Mixer showers take water from your hot and cold supplies and mix them to create the perfect temperature. Most Mira mixers work on all the common UK water systems, but it's important to check before installation. If you have a low pressure system, you can boost the flow by adding a Mira shower pump.

Choosing your temperature control

Mixer showers have 3 different types of temperature control.

Manual means your shower temperature may vary as it can't compensate for changes in the incoming supply temperature or pressure.

Pressure Balancing mixers compensate for any change in water pressure. Giving you a constant showering temperature, as long as the supply temperature remains constant.

Thermostatic control constantly monitors the incoming water temperature and adjusts itself to keep the temperature stable. It offers excellent control and stability, which is ideal for families with young children or the elderly.

Mira Magni-flo™

Make your showering experience the very best it can be with our revolutionary Mira Magni-flo™ technology.

Our unique, patented Magni-flo™ technology really sets our mixer showers apart. The revolutionary design provides up to 3 times* more water flow, even at low pressure. Making Mira mixers the most powerful mixers available in the UK today.

*When tested under identical conditions against a range of similar mixers at 0.1 bar pressure, which is normal in homes with low pressure. Results show that mixers with Magni-flo™ can give up to 3 times more flow than mixers from other shower companies.

Overview - mixer showers

We've got a wide range of designs to choose from. Some of these designs are available in different configurations – EV, BIR, BIV, ER and ERD, so you can choose the style and configuration to suit you.

Valve types explained

EV exposed variable

The shower control is mounted on the wall. Your shower comes with a showerhead, hose, clamp bracket and slide bar. Some models also come with a soap dish.

BIR built-in rigid

The controls and showerhead are both built into the wall. There's no hose or slide bar, so your shower has a minimalist look.

BIV built-in variable

The shower control is built into the wall for a smart, clean finish. The shower comes with a showerhead, hose, right-angled hose connector, clamp bracket and slide bar. Some models have a soap dish too.

ER exposed rigid

The shower control and showerhead are both mounted on the wall on a single riser bar.

ERD exposed rigid with diverter

The shower control and showerhead are both mounted on the wall on a single riser bar. The shower also has a second adjustable showerhead.

Digital showers

Digital showers, like mixers, take water from hot and cold water supplies and then mix them, creating your ideal temperature.

Our digital showers use separate mixer unit and shower controls. This means you can mount the slim mixer unit away from the shower, in a loft or under a bath for instance, offering easier access for servicing. It also reduces the amount of pipework and the shower controls take up less space too.

Plus, when it comes to shower control it doesn't get more flexible than our wireless controllers featured on pages 46 and 47. You can mount them up to 10 metres away from the digital mixer unit, making Mira digital showers a flexible option.

Multi-function

Whether you're showering, filling a bath or a combination of both... the choice is yours.

Eco Mode

Conserve water and make a saving with the Eco setting.

Warm-up Feature

No need to step in until the temperature is just right thanks to the warm-up feature.

Pre-programmable

Set your maximum temperature limit and duration of your shower or bath fill at the touch of a button.

Digital Display

The digital clock display and shower timer ensure that you'll never be late again.

Main benefits

- Maintains a stable temperature to the degree.
- Separate controls to start and stop, or for flow and temperature.
- Features a warm-up mode which can be programmed to reach your chosen temperature before you step in.
- Water saving 'Eco' setting, warm up mode, clock display and maximum temperature setting to prevent scalding.
- Designed to work with our wireless controllers from up to 10m away from the digital mixer unit.

Overview - digital showers

We've got a stylish range of single or dual outlet digital showers to choose from, with options to cater for all water systems and pressures. If you would like more information on our digital range please call us on **0844 571 5000** or visit www.mirashowers.co.uk

Electric showers

Our electric showers are packed with exclusive innovations, advanced technology and clever safety features.

Electric showers only use water from your mains cold water supply, making them a great choice for most homes. The big advantage is they don't use any stored hot water at all. They heat the water when you turn the shower on, passing it over a built-in heating element, similar to how a kettle works. Ideal if you have a limited supply of hot water. It's also ready to use whenever you need it, whether your water tank's full or not.

And because they are so economical with water, all Mira electric showers meet the stringent standards of the Bathroom Manufacturers' Association (BMA) for using water efficiently.

Choosing your temperature control

Electric showers have 4 different types of temperature control:

Pressure stabilised controls minimise temperature changes and ensure a consistent showering temperature, even if someone runs a tap.

Advanced pressure stabilised is our pressure stabilised control with the benefit of Mira Opti-flo™ technology. It gives you a wider range of flow rate so you can enjoy the full power of the shower even in the summer when the incoming water temperature is higher.

Thermostatic technology ensures that the temperature won't fluctuate beyond 2 degrees of your chosen temperature. A brilliant safety feature, ideal for families with young children or the elderly.

Advanced thermostatic is the ultimate in safe showering. Electronic technology makes sure that the water temperature is always consistent, usually within 1 degree. Plus every shower in the Mira Advance ATL range has been awarded the BEAB Care marque accreditation, making them ideal for the healthcare sector.

Key technologies

Mira Sensi-flo™ prevents scalding if there's a drop in water pressure or if the showerhead or hose become blocked.

Mira Clearscale™ incorporates DualElement™, phased shutdown and rub-clean nozzles. This reduces limescale by 50% so your shower performs better and lasts longer.

Mira Opti-flo™ gives you a wider range of flow rate so you can enjoy the full power of the shower. Ideal in the summer months when incoming water temperature is higher.

Mira DualElement™ the heater tank runs at cooler temperatures ensuring constant power throughout the element. This reduces 'hot spots' where limescale tends to accumulate.

Overview - electric showers

We've got a wide range of electric showers to choose from, which are available in different kilowatt power ratings. Look for a higher kilowatt rating if you want a more powerful flow. All of our electric showers are approved by the BMA as being Water Efficient. If you would like more information on any of our electric showers, please call us on **0844 571 5000** or visit **www.mirashowers.co.uk**

When buying an Electric shower you will notice that the kilowatt ratings are given are based on 240 volts. As Ireland operates at 230 volts we have included a table that converts the power rating. If you have any queries please discuss with your installer.

UK and Ireland kW conversions

240v (UK)	230v (Ireland)
7.5kW	6.9kW
8.5kW	7.8kW
9.0kW	8.2kW
9.5kW	8.7kW
9.8kW	9.0kW
10.8kW	9.9kW

Power showers

Nothing beats the exhilaration of standing under a truly drenching flow of cleansing water with an internal pump to boost the flow and give you a shower that delivers this stunning experience every single time.

Power showers mix water from both your hot and cold supplies on low pressure systems to give you your ideal temperature. If you've got a plentiful supply of hot water in your home, a power shower could be ideal.

If you'd like a powerful flow but would prefer a mixer shower, you can install a separate shower pump - see page 43 to find out more.

Which temperature control?

There are two different types of temperature control available with power showers. Simply choose the one that you'd be happiest with – you can see which shower comes with which type of control over the following pages.

Manual your shower will not compensate for changes in the incoming supply of pressure and the shower temperature may change.

Thermostatic gives you great temperature control and are ideal for people who are at risk, such as the very young or elderly.

Overview - power showers

We've got a stylish range of all-in-one power showers to choose from. These types of showers have a built-in pump which boosts the flow rate. If you would like more information on any of our power shower range please call us on **0844 571 5000** or visit **www.mirashowers.co.uk**

Shower enclosures

Extensive investment in research and development help us create striking yet practical designs that last.

Mira Beam shower enclosures are a stunning piece of engineering, designed to offer durability and longevity. Each one provides maximum flexibility for effortless installation with up to 29 mm of adjustment for uneven walls. Frameless doors create a premium feel and a range of styles, types and sizes deliver a distinctive look, perfect to enhance any bathroom.

Combining design and technology

Coated glass ensures your Beam enclosure is easy to clean and retains its outstanding look.

The planet gear mechanism found in our bi-fold model makes sure the door closes smoothly and will always be perfectly aligned. While magnetic strips along the top and bottom guarantee a strong consistent closure.

Double rollers on the sliding quadrant and corner doors create a smooth, gliding action and consistent performance.

The adjustable ball catch featured on the pivot door, provides great flexibility for installation and optimum performance, whilst being adjustable for years to come.

How to choose your Mira Beam alcove or corner shower enclosure

Whatever you're looking for in a shower enclosure, it can be found within the new Mira Beam enclosure range. But which is right for you? Just follow these 3 simple steps:

Step 1 - preparation

Measure the width of your shower door but importantly also measure the space available in the bathroom to get in and out, and for the door to open.

Step 2 - choose your location

Are you installing the door in an alcove or corner site?

Step 3 - choose your door type: alcove or corner enclosure

Alcove enclosure

N.B. Remember to check that the door opening is wide enough for your needs

Walk-in - a walk-in enclosure has no door at all so you can just walk straight in and shower. Remember that there will always be some water splashing on the floor with a walk-in.

Pivot door - offers the widest opening for a given size of enclosure – just make sure that there is space in the bathroom for the door to open. Remember the door is reversible so can open to the left or right.

Bi-fold door - ideal if there is not enough space in the bathroom for a pivot door as the door folds inwards. May not be the best solution if your mobility is limited as you will need to move out of the way of the door to open it.

Slider - another door that does not intrude into the bathroom space and provides a very easy to use solution for widths of 1000mm and over.

Corner enclosure

N.B. Don't forget to order a side panel as well as a door to complete the enclosure. Remember to check that the door opening is wide enough for your needs.

Walk-in - a walk-in enclosure has no door at all so you can just walk straight in and shower. Remember that there will always be some water splashing on the floor with a walk-in.

Pivot door - offers the widest opening for a given size of enclosure – just make sure that there is space in the bathroom for the door to open. Remember the door is reversible so can open to the left or right.

Bi-fold door - ideal if there is not enough space in the bathroom for a pivot door as the door folds inwards. May not be the best solution if your mobility is limited as you will need to move out of the way of the door to open it.

Slider - another door that doesn't intrude into the bathroom space and provides a very easy to use solution for widths of 1000mm and over.

Quadrant - a very space efficient solution with its double sliding doors and elegant curved shape.

Pentagon - gives more usable space in the bathroom as the door opening is central.

Divider panel - allow an unobtrusive frameless structure with unique modern styling.

Mira Flight Trays

Mira Flight shower trays are not only lighter, stronger and easier to fit they are renowned for leading technology too.

We've brought the Mira Flight range right up to date with a contemporary, sleek look and a host of reassuring features you'd expect from Mira. Made from strong acrylic capped resin stone our Flight trays are incredibly robust. They're also scratch and chip resistant and designed to keep their great colour for a lifetime.

Exclusive leading technology.

Every Flight tray includes exclusive BioCote® technology which reduces bacteria and mould growth by up to 99.9%.

Other outstanding features include:

- Branded white walk-on waste, which adds to the slim-line, stylish finish
- Optional riser kit featuring strong 'push-fit' legs for solid floor applications
- Includes waste trap
- Variations with integral upstands for watertight performance
- 10 year guarantee for home use

Mira Flight Low Trays

Made from durable acrylic capped, resin stone, Mira Flight Low isn't just incredibly tough and surprisingly light, it's also one of the lowest trays you can buy.

Our impressive low profile tray is a super thin 40mm, making it one of the lowest trays in production. It allows you to create that amazing 'wet room' look in any bathroom. Mira Flight Low trays also have all the hardwearing benefits you'd expect, ensuring they're chip and scratch resistant whilst keeping their great colour for a lifetime.

Exclusive leading technology.

Each one features Flight Low vortex waste which rapidly sucks water from the tray at a maximum of 30 litres a minute.

They also include exclusive BioCote® technology, proven to reduce bacteria and mould growth by up to 99.9%.

Other outstanding features include:

- Optional riser kit featuring strong 'push-fit' legs for solid floor applications
- A slimline waste cover
- Vortex waste
- 10 year guarantee for home use

40mm

Mira Flight Low trays

- Only 40mm high
- Scratch, chip and discolouration resistant
- Optional riser kit featuring strong ‘push-fit’ legs for solid floor applications
- Vortex waste which rapidly sucks water from the tray from 25 - 30 litres a minute
- Includes BioCote® to reduce bacteria and mould growth by up to 99.9%
- Variants with integral upstands for watertight performance
- 10 year guarantee for home use

Mira Flight Safe Trays

Developed with our exclusive Mira Safe coating, Mira Flight Safe trays exceed the most stringent independent anti-slip tests in the UK.

Designed to the same high standards as all Mira Flight trays, complete with durable acrylic and resin stone, this Flight tray features our own market leading anti-slip technology, Flight Safe. The unique coating is bonded to the tray for a smooth, long lasting finish. It creates a surface that won't peel or rub off and is also incredibly easy to clean.

Exclusive leading technology.

It boasts the same low profile as the Mira Flight Low tray, of just 40 mm depth and features our BioCote® technology, which is proven to reduce bacteria and mould growth by up to 99.9%. The super sleek Flight tray also has the vortex waste as standard, which sucks water away at a rate of up to 30 litres a minute whilst also being self-cleaning.

Other outstanding features include:

- Tray has Mira Flight Safe anti-slip coating
- Easy to clean – anti-slip surface tested extensively

- The same white colour (matt finish) as other Mira Flight trays
- Optional riser kit featuring strong 'push-fit' legs for solid floor applications
- Optional integral upstand for water tight performance
- A slimline waste cover
- 10 year guarantee for home use

Mira Flight Safe trays

- Tray has Mira Flight Safe anti-slip coating
- Easy to clean – anti-slip surface tested extensively
- Only 40mm high
- Scratch, chip and discolouration resistant
- Optional riser kit featuring strong ‘push-fit’ legs for solid floor applications

- Vortex waste which rapidly sucks water from the tray from 25 - 30 litres a minute
- Includes BioCote® to reduce bacteria and mould growth by up to 99.9%
- Variants with integral upstands for watertight performance
- 10 year guarantee for home use

Accessories

Even Mira accessories are carefully designed with great attention to detail and innovative thinking.

Experience the very latest in showering technology
Our design teams are constantly developing new and innovative showerheads to bring you an even better showering experience. Here's some of the latest additions to the Mira range:

- **Mira Eco** is a water-saving showerhead that can save up to 75%* of the water your shower uses and you won't notice any difference to the flow.

- **Mira Everclear** is specially designed to stop limescale building up, so your showerhead gives a consistent flow, offers great performance and a longer life.
- **Mira 360** is a brand new type of showerhead that literally turns showering on its head. Its simple flip action rotates the head to create four unique and invigorating sprays.

*When compared to a Mira Logic showerhead at 0.5 bar pressure. Mira Eco is not suitable for electric showers or gravity fed systems under 0.5 bar pressure.

Overview - accessories

Whether you're creating a new bathroom from scratch or simply replacing a shower part, we offer a wide range of accessories that are easy and simple to fit.

From showerheads that use less water to stylish soap dishes, we have an inspiring selection and most of the range will fit other showers too. So you can make Mira the finishing touch to your home.

Kohler® family of businesses

We're owned by Kohler Co, one of the world leaders in bathroom design. KOHLER has been setting the standard for innovation, craftsmanship and new technology across the globe since 1873.

Kohler in the UK brings together a number of market-leading bathroom and shower brands, including KOHLER, Mira Showers, and RADA, to bring you an inspiring collection of bathroom sanitaryware, bathroom furniture, taps, showers and shower enclosures.

If you'd like to know more about the range of KOHLER products, please visit www.kohlermira.co.uk

Approval Marques

WRAS Assesses products for compliance with regulation 4 of the Water Supply (Water Fittings) Regulations 1999.	Developed by the BMA to raise awareness of bathroom products that when installed and used correctly use less water and save energy.	Certifies Type 2 Thermostatic mixing valves for the domestic market to promote the safe use of hot water, with the immediate focus on social housing.
Awarded by the BEAB to products that have been evaluated against the highest European and International standards.	Waterwise is the leading authority on water efficiency in the UK. Every year they award their Marque to products that cut back on wasted water.	
Awarded by the BEAB to products that have been additionally tested on performance relating to application in the care sector.	Shows that the product has been endorsed by the Royal National Institute of Blind People (RNIB).
