Standard Single Pumps

Standard Single pumps are ideal for boosting a water supply in vented systems. Suitable for positive head applications only.

Suitable for domestic use, Monsoon Standard pumps will function under positive head conditions and are suitable for installation into open vented hot and cold water systems.

Monsoon Standard pumps require a flow of just 0.6 l/min through the outlet to start.

Features

- Robust brass construction
- 2.0 - 4.5 bar performance options
- Continuously rated
- EPDM/PTFE/Al. Oxide seal
- G $\frac{3}{4}$ threaded connections
- Pre-wired with 1.5 metre power cable
- Anti-vibration feet
- 5 year guarantee (subject to conditions)
- **UK Specification:** Supplied with 22 mm push-in x 300 mm anti-vibration flexible hoses with integral isolating valves
- **ROI Specification:** Supplied with 21 mm push-in x 300 mm anti-vibration flexible hoses with integral isolating valves
- **Export Specification:** Supplied with G $\frac{3}{4}$ female x 300 mm long hoses

Application

- Boost the water pressure in either the hot or cold water supply in a positive head application.
- Boost the blended water outlet between the shower valve and the shower rose.

* The maximum pressure that can be applied to the pump under any installation conditions.

** A stored water temperature of 60 °C is considered sufficient to meet all normal requirements and will minimise deposition of scale in hard water areas.
